Summary

Oracle PL/SQL and APEX Developer with 5+ years of experience building high-performance procedures, packages, triggers, and bulk operations (FORALL, BULK COLLECT) for enterprise systems (Oracle EBS, Oracle Retail). Skilled in developing secure, user-friendly applications using Oracle APEX, integrating with external services via REST APIs, and optimizing backend processes.

Education

Texas A&M University Kingsville

Master of Science in Computer Science

August 2023 – Aug 2025

Kingsville, Texas

Experience

Actum Processing

Oracle APEX Developer

Sep 2025 – Present

Austin, TX, USA

- Designing and developing **Oracle APEX applications** to support business workflows and payment processing systems.
- Writing and optimizing **PL/SQL procedures and functions** for backend data processing.
- Integrating APEX applications with external services and **REST APIs** for seamless data exchange.

Texas A&M University Kingsville

Graduate Research Assistant

Jan 2024 – Dec 2024

Kingsville, TX, USA

- Built modular **Python pipelines** to convert large FASTA files into model-ready format, reducing processing time by **60%**.
- Applied **CNN, RNN**, and **LSTM** models for DNA sequence classification, improving prediction accuracy by 35% over baseline.
- Developed and optimized **C++** code to generate mutated **DNA sequences**, accelerating synthetic dataset creation by **70%**.

Deloitte Consulting Private Limited

Oracle PL/SQL Developer | Oracle Retail

Oct 2021 – Jul 2023

Pune, India

- Developed PL/SQL procedures and packages to automate **GCP to Oracle RMS** data transfer, streamlining stock ledger loading and reducing upload time by **40%**.
- Built and deployed PL/SQL-based integration to process and load **retail invoice flat files** into **SAP ERP**, enhancing end-to-end reconciliation and improving data accuracy by **60%**.
- Developed a backend solution in **Oracle Retail Cloud** to automate **location list uploads** by enabling frontend sheet ingestion, validating the data using **PL/SQL procedures**, and inserting cleaned records into target Oracle Retail tables, reducing manual effort by **70%**.
- Created optimized **Shell scripts** to invoke **SQL*Loader** for high-volume batch loading of flat files into Oracle Retail base tables, processing millions of records with robust error handling and performance tuning.
- Designed and customized **Oracle BI Publisher Reports** for stock ledger, invoices, and promotional deals across Oracle RMS, enabling actionable insights for retail operations.

Tata Consultancy Services Ltd.

Oracle PL/SQL Developer | Oracle EBS

Apr 2019 – Oct 2021

Pune, India

- Developed **PL/SQL inbound conversion programs** using procedures and packages to migrate Coupa Purchase Order flat file data into **Oracle EBS Supplier tables**, automating 80% of PO onboarding and saving **20+ hrs/week**.
- Built PL/SQL scripts to automate **Oracle EBS user creation** by parsing flat files and invoking user creation APIs; integrated with **UTL_SMTP** to send confirmation emails upon successful account setup.
- Scheduled and orchestrated PL/SQL-based integrations for Invoices, Purchase Orders, and Users using **Control-M**, with file detection logic and dynamic parameter handling for automated batch execution.
- Implemented **Supplier API** integrations to update supplier records programmatically, including contact and banking information validations.
- Designed and implemented **Invoice integration** from flat files to Oracle EBS: validated records, inserted into interface tables, and triggered the Payables Open Interface Import program to create invoices in the base tables.
- Developed Receipt data integration workflows to populate receiving interface tables and run the standard Receiving Transaction Processor for automatic creation in Oracle EBS.
- Worked extensively in **SYSADMIN** responsibilities including creation of users, responsibilities, concurrent programs, request groups, and function/menu assignments.
- Engaged across core **Oracle EBS modules** including Purchasing (PO), Payables (AP), Receivables (AR), Inventory (INV), Order Management (OM), General Ledger (GL), and Supplier Management.

Skills

- Languages:** PL/SQL, SQL, Shell Scripting, Python, Java, C++
- Databases:** Oracle, MySQL, SQL Server, Snowflake
- Oracle ERP Modules:** Oracle EBS (PO, AP, AR, INV, OM, GL), Retail (RMS, ReSA, RPM, Retail Cloud)
- Tools:** SQL Developer, TOAD, Oracle BI Publisher, Oracle Forms/Reports, SQL*Loader, Oracle APEX
- Big Data:** Hadoop, Apache Spark, Hive, Kafka
- Machine Learning:** Scikit-learn, TensorFlow, Keras
- Visualization:** Power BI, Tableau, Oracle BI
